

Sherry A Ault

Sherry Ann Ault is a professional specializing in Design/Assist and Integrated Project Delivery approaches. Since entering the industry in 2005, Sherry has become familiar with the dynamic relationships between architecture and engineering design teams, as well as general contractors and subcontractor relationships. Her background and training make her especially cognizant of the unique relationships between the design and construction disciplines.

Early in her education, Sherry developed a passion for architecture, structure and the process of construction. She began her career in Knoxville with a prominent design firm, gaining expertise in university, commercial, and sports architecture. She then relocated to North Carolina where her primary focus shifted to managing fully integrated Building Information Modeling projects through all phases of design and construction.

After moving back to Tennessee, Sherry utilized her diverse background in architecture, engineering, and construction to form S2AIntegration, LLC to provide Virtual Design and Construction and Building Information Modeling services across the southeast.

Professional Experience:

S2A Integration, LLC | Founder + Chief Executive Officer | September 2013 – Present

Rodgers Builders Inc. | Virtual Construction Specialist | 2011 – 2013

Stewart Engineering | Structural Engineering Intern + BIM Specialist | 2010 – 2011
