

INTEGRATION

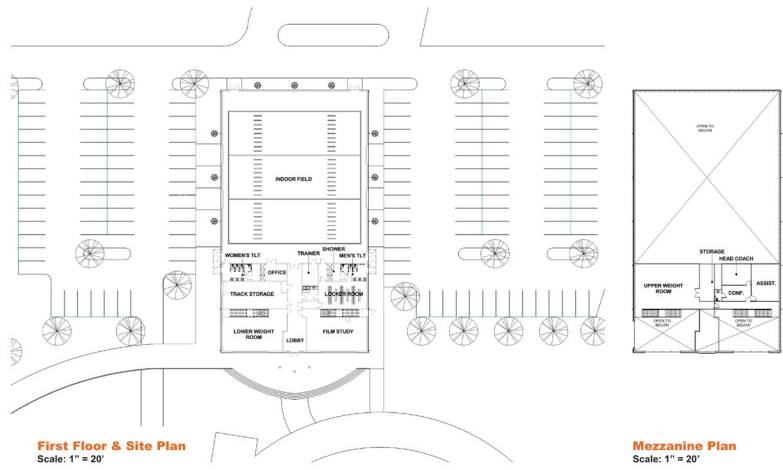

Clinton High School Field House

Clinton, TN

Hollingsworth Companies teamed with local design and construction teams to develop a new multi-sport complex for Clinton High School. The 23,000 SF project includes demolition of several existing structures and provides a state-of-art facility to sports teams. This two-story facility provides a 35-yard indoor turf field with a 40-foot ceiling, a 75-seat multimedia room, a training room for rehabilitation, a two-level weight room, coaches' offices, a conference room, and an 80-person locker room. This facility replaces an existing facility that was built in 1985.

S2A was approached to provide the schematic design drawings as well as 3-dimensional renderings of the space. This imagery was used for fundraising and raised over \$750,000 as of May 2017 to build the new facility. The Founder and CEO of S2A, Sherry Ault, is originally from Anderson County and therefore choose to provide these services at no cost as a gift to her home community.

Please visit www.chsontherise.com/contributors-and-donations to help with the fundraising efforts for the CHS sports facility.
