

## **Ashley M Richardson, Virtual Design + Construction Modeler**

Ashley Richardson moved to Tennessee in the fall of 2013 from Baton Rouge, where she was involved in finance. After her move, she changed career paths to the BIM industry, where she found her passion. She had always found an interest in design and construction, and wanted to further explore a career in that direction. She sought out a degree in drafting and design from ITT Technical Institute and joined S2A Integration in August of 2015 as a Virtual Design and Construction Modeler.

### **Professional Experience:**
