

## HCA Corporate Office Building 4 + Parking Garage

Nashville, TN

Collaborative Studio provided architectural design services for a total renovation and expansion of a data center into a new \$40M-plus corporate office building project. This project involves a four-level parking garage and a 14,500 SF addition that will include a large kitchen and dining area, conference center, and fitness center.

S2A was contracted to provide the 3-dimensional as-built documentation for architecture and structural trades. These drawings were used to create the demolition documentation. Additionally, S2A assisted Collaborative Studio with the construction document development for the architectural and interior trades. Virtual renderings were also developed to help express the overall look and feel to the owners throughout the design process.

**Client** Collaborative Studio | Nashville, TN

**Services** 3D As-Built Documentation (A/S), Construction Document Development, Virtual Rendering
