

## Wellsprings Retirement Community

Greensboro, NC

Rentenbach provided construction services for a \$30M expansion to a retirement community providing a 29,000 SF Resident Activity Center. The expansion includes a 325-seat state-of-the-art auditorium that accommodates music and theater performances, lectures, and memorial services and is modeled after an auditorium at Westminster Canterbury Richmond in Virginia. Upon completion, the retirement community will become the only one in the state with a large-scale auditorium. Other spaces within the center include a rehearsal room, two art studios, and a woodworking and furniture-making studio.

This expansion also includes a 16,000 SF informal dining area providing additional culinary options for residents. The informal dining area will supplement an existing formal dining suite and is focused on providing bistro-style eating options.
