

INTEGRATION

First Tennessee Banks

USA

S2A was contracted to create as-built 3D documentation in an effort to help First Tennessee Banks and their renovation process to update the bank facilities with a more open floor plan concept. As-built modeling helps design teams to see what the existing conditions are which gives them a head start on the design process and potentially find any issues that may arise. Coast 2 Coast Surveys provided S2A with 2D drawings of floor plans, elevations, ceiling plans, MEP systems layout, and furniture layouts to help with the creation of the 3D models. These 3D models included details such as; surface material to interior and exterior walls, floor and ceiling finishes, plumbing fixtures, security equipment, HVAC equipment, canopies, awnings, and overhangs.

Client **Coast 2 Coast Survey | Chattanooga, TN**

Services 3D As-Built Documentation including Architecture, Structure, MEP
