

Moxy Hotel

Nashville, TN

With construction led by Lee Company, hotel chain Marriott's new Millennial focused brand Moxy, is located in the up and coming Hillsboro Village in Nashville. The six-story, 150+ room hotel features a ground floor retail front spanning between two buildings. It was converted from the former Richard and Richards building on Broadway. The "newish budget-savvy traveler hotel concept" is oriented around a relaxed atmosphere to cater to the growing demographic of Nashville.

S2A provided the Mechanical and Plumbing coordination for the multi-level renovation; outfitting the structure to accommodate the 150+ rooms, retail space, and bars located both on the base level as well as the rooftop. S2A also provided as-built documentation.

Client **Lee Company** | Nashville, TN

Services VDC Management, Mechanical/Plumbing 3D Coordination Modeling, As-built Documentation (A/S/MEP)
