

William F. Conley Building

Knoxville, TN

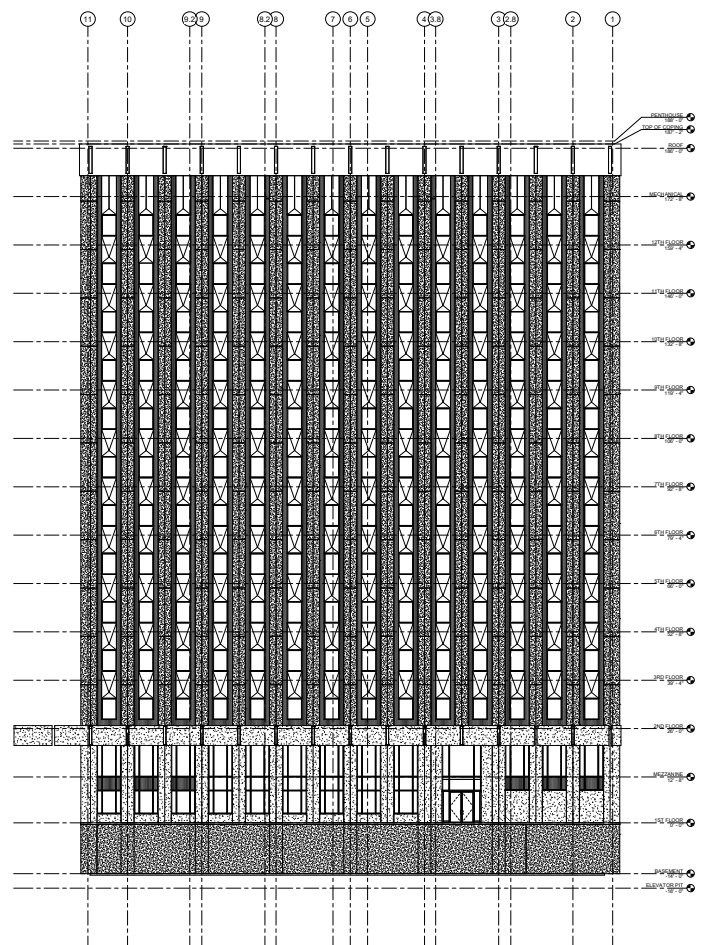

Fixed on the corner of Gay St. and Union, the William F. Conley building is a 13-story, 154,000 SF Embassy Suites. Previously used as office space for banks and other businesses, the new hotel features a restaurant on the first floor, 160+ hotel units, 2 condos on the top floor, as well as a rooftop bar and swimming pool. The \$40M project will feature local art, pink Tennessee marble, and other local touches throughout the building. To undertake the renovation, S2A created as-built documentation of the interior to make plans for the demolition of the interior, as well as giving reference for the rest of the build.
