

INTEGRATION

HCA Healthpark

Nashville, TN

In order to accommodate the growing need for physician space in the area, Collaborative Studio renovated a 259,000 SF office building, greatly expanding their scope of operations. The renovation allows the medical offices, as well as a full-service kitchen and café area designed to cater to the physicians.

To begin renovating the existing complex, S2A assisted by creating a 3-D model in order to tie the existing structure to the newly designed office space.
