

UT Knoxville Medical Center

Knoxville, TN

Del-Air, Airgas Healthcare, and UT Medical Center collaborated to improve the current gas piping system to allow the 685-bed hospital to continue their ongoing commitment to improve the quality of health care in the East Tennessee, Southeastern Kentucky and Western North Carolina.

The dedicated professionals at the medical center thrive in a fast-paced, challenging environment, where expert commitment plays a critical role in the hospital's ongoing success.

S2A Integration provided medical gas as-built documentation, equipment photo documentation and valve identification, labeling, and scheduling on drawings.
