

PARK(ing) Day Knoxville 2020

Knoxville, TN

PARK(ing) Day is an annual event around the world where community members can transform metered parking spots into temporary public parks or parklets. PARK(ing) Day was created in response to the majority of outdoor urban space being dedicated to a single vehicle. This event is an exciting way to revitalize the parking spot into a space for social interaction and artistic expression.

The winners of the event are DIA/Knoxville Happiness Coalition, MHM/Knoxville Knox County Planning, BMA/Maple Hall, University of Tennessee American Society of Landscape Architects, and UTK American Institute of Architecture Students.

S2A was asked to donate their reality capture services to create an accurate virtual environment for the designers. In addition to point cloud scanning services, panoramic photographs were provided to assist in designer site navigation.
