

INTEGRATION

# Boat Manufacturing Plant

Madisonville, TN

S2A utilized markups and submittals to create drawings for the renovation of an existing manufacturing plant located in Madisonville, TN. The mechanical and ductwork will support the upgrades of the new boat finishing and repair center. S2A also modeled the architecture/structure of the manufacturing plant. S2A provided permit documentation and any revisions that resulted in as-built conflicts. Additionally, S2A assisted Volunteer Mech in creating revisions for changes made during site meetings and conflicts that arose.

**Client** Volunteer Mechanical | Knoxville, TN  
**Services** Mechanical, Arch/Struct Design and Documentation
